

Intelliverse[®] Hosted IVR

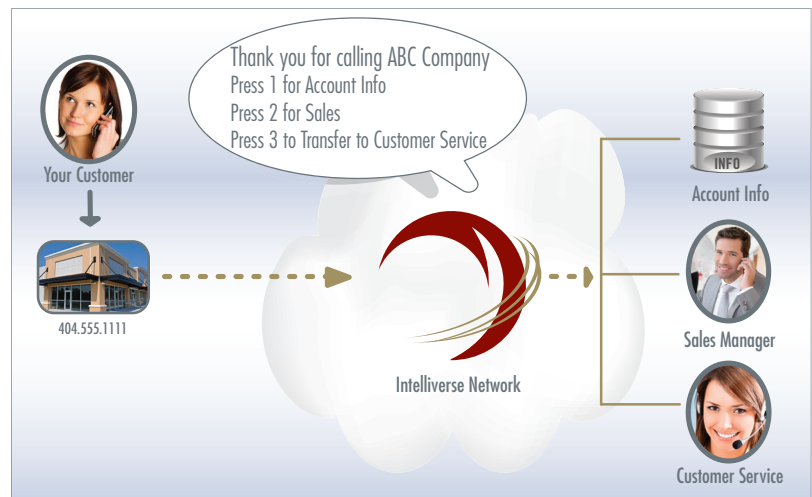

Hosted IVR

Reduce hold times & operational costs by meeting your customers' routine needs quickly and freeing your staff to focus on more profitable activities.

Intelliverse's Hosted Interactive Voice Response (IVR) solution offers you multiple ways to automate inbound and outbound contact with your customers. Now, you can easily meet your customers' needs, from providing instant account information to getting feedback on a survey. And, all the while, lowering your costs and gaining more insight about your business through extensive reporting.

Business Benefits

- Automate inbound calls to your organization
- Connect to your customers with outbound communications
- Gain more insight about your business with extensive, custom call reporting
- Leverage your existing infrastructure with a cloud-based solution:
 - » No equipment to buy, install or maintain
 - » No software upgrade costs
- Offer 24/7 coverage
- Support multiple languages
- Easily scalable for changing/seasonal call volumes
- Quick ROI with fast and affordable implementation

Well-Planned, IVR Automation Empowers Your Business

Optimize your current business processes and create new revenue streams for new market opportunities:

- From Staffing to Surveys
- From Emergency Notifications to Outbound Call Campaigns
- From Product Recalls to Marketing Campaigns
- Many more solutions...

How IVR Works

AS AN AUTO ATTENDANT

- Incoming callers are presented with a simple menu of options, which allows them to leave a message, listen to pre-recorded information, or speak to an attendant
- A nationwide/worldwide solution that enforces a consistent image and allows stores to retain local presence
- Off-loads redundant, non-revenue generating calls so employees can spend more time with walk-in customers and sales calls
- Increases store profitability by shifting store resources from customer service to sales
- Introduces method to measure call volume and call types by location
- Compatible with any existing technology infrastructure

AS AN ACCOUNT INFO LINE

- Provide your customers 24x7 access to account balances, due dates, and payment information
- Integrates fully with your databases and host interfaces
- Routes callers intelligently to resources such as customer service, tech support or billing
- Accepts and processes credit card & ACH payments

AS A LOCATOR SERVICE

- Informs callers of your closest location – address, hours and directions
- Transfers callers to their desired location

AS AN OUTBOUND NOTIFICATION

- Remind customers of upcoming appointments or payments due
- Automate process of collecting from past due accounts

Reporting

Intelliverse offers a robust, web-based information center. With online access you can review your reports when you want, and how you want. You have total control of how your information is delivered, and to whom.

Sample Report - Call Volume Details											
Sample Company										Reporting Period: 05/2011	
	Language	Total Calls	Calls During Operation	Calls After Hours	Transfers Billing	Play Hours Address	Transfers to Call Center	Transfers to Auto Account	Calls Abandoned	Calls Offloaded	% Offload

As an alternative to web-based report retrieval, raw data files can be downloaded or pushed directly to your servers

What Will IVR Do For Your Business?

You tell us! In addition to all the ready-to-go applications, Intelliverse is geared up to customize a solution just for you. Do you need customers to be able to easily select cities or names? Speech recognition makes it happen. Does your non-profit organization need an efficient way to solicit donations? We can do that with an outbound call function. Want to provide customers with information on their orders? We'll customize an application that integrates with your databases. Just tell us what you want, and we'll build a solution for you. Let Intelliverse Interactive Voice Response (IVR) turn your phone into a customer-pleasing, information-gathering, image-improving, revenue-generating tool.
