

## Intelliverse<sup>®</sup> Hosted VoIP

Intelliverse's Hosted VoIP service connects all of your business locations without the need of an expensive PBX system.

- Auto Atendant
- Extension Dialing
- Find me/Follow me
- Hunt Groups
- Compatible with any phone/broadband

## Hosted VoIP

**Reduce your telecommunications costs and increase your communications options**

### How Does Hosted VoIP Compare To:

#### A standard business phone line?

Intelliverse Hosted VoIP offers features such as auto attendant, hunt group, extension dialing and extension-to-extension call transferring – all features not available with a standard business line. Intelliverse Hosted VoIP gives your small business the professional image of a "large business".

#### Centrex?

Intelliverse Hosted VoIP offers Centrex-related features with the added advantage of a worldwide network that allows you to use these features between all of locations, as opposed to only one location. Additional Intelliverse features include Softphone, video calling and an easy-to-use interface that gives you control.

#### A Key System or PBX?

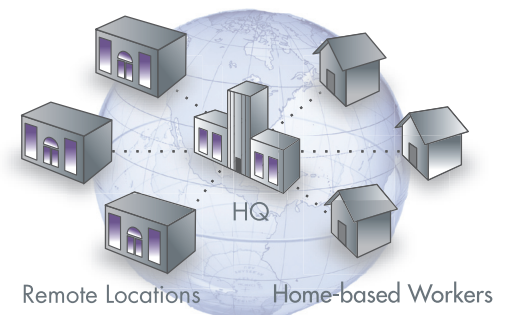

Just like with Centrex, Intelliverse Hosted VoIP is network based and allows you to use "key system" features between and among all of your locations.

Additionally, with Intelliverse Hosted VoIP there is no need for proprietary phones (as is the case with Key systems) which offers you the flexibility to choose the most economical phone for your needs. Since Intelliverse Hosted VoIP is not a premise, equipment based solution, there is no requirement for you to employ or contract with a service technician.

### Usage Scenarios

1 A global pharmaceutical company has 5,000 employees throughout the world that work out of their home office and are often on the road selling. Each rep has their own business phone line which allows them to make and receive calls when they are sitting at their desk. Using Intelliverse Hosted VoIP, the reps can now use new features such as find me/follow me to ensure that they never miss an important customer call even when they are not in their office. In addition, the corporate office is able to keep all the phone numbers, even after an employee leaves the company.

2 A large insurance company with numerous regional and local offices was using a PBX system at each location. After switching to Intelliverse Hosted VoIP, the company has the same features as the PBX but no longer has to worry about maintaining the equipment in each office. Even better – the features now work "inter-office" rather than just within each office. Plus, using the Intelliverse Hosted VoIP portal the insurance agents can now upload the latest brochures, applications and compliance documents so their customers can easily retrieve them anytime via the web.

# Business Voice Service Options to Fit Any Technology Environment:

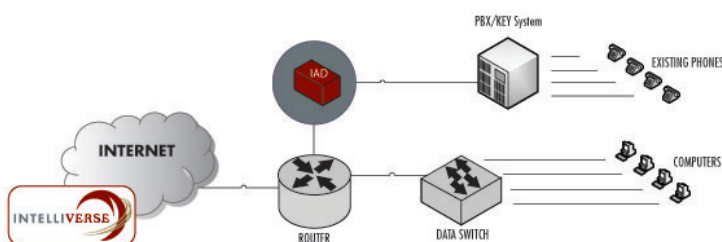

## Environment:

### SIP TRUNKING

- Reduce local & LD costs while using an existing phone system
- Worldwide coverage - one provider around the world
- Free calling between all users on the service
- Available upgrades include electronic faxing and IVR

#### Features:

Local dial tone, E911 (U.S.), directory listing, caller id with name - all which easily integrate with your existing phone system.

### HOSTED PBX

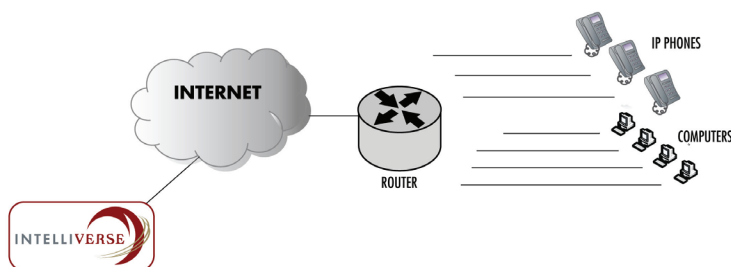

All the features of a big business phone system - except:

- No equipment to buy, install or maintain
- Affordably priced
- Features work between all offices and employees, regardless of geographical location
- Free calling between all users on the service
- Available upgrades include electronic faxing and IVR

#### Features:

Includes all the SIP Trunking features, plus those provided by a business class phone system, including:

- Extension Dialing & Call Transfer
- Auto-Attendant
- Voice Messaging
- Hunt Group
- Find Me/Follow Me
- Self Administration

## Why Are Businesses Using BOTH Hosted IP PBX and SIP Trunking?

- Some offices have existing phone systems (main office, HQ) and some offices don't (smaller branch offices, home based workers)
  - » Use **SIP Trunking** in offices with existing phone systems
  - » Use **Hosted PBX** for ALL other offices
- Flexible and affordable solution
- All calling between locations is free!
